

Tapescript EFSP 3.3 Listening 1: Notecard Practice

My passage is titled Stop Crime Yourself

It says it very easy to get discourage if your job is to cut down the amount of robber in the society. If crime figure go up, everyone criticise the police for not doing enough.

However, crime takes two. Yes, I know a man who always carry five thousand dollar in his wallet - so the robber was easy to rob him. So we must be more carefuller.

Furthermore - shops want people to buy things so they put them easy to reach. We look goods and there are no assistants as they are costly so we can walk around and put them in our trolley even gold shops you can walk in and not much security. Robber is easy to take away gold.

Moreover ordinary people leave wallets on tables. I know my friend does. And homes - not much bars on window. Easy for robber come.

In Amsterdam the city council has found a new way to try and shock peoples into being careful on the streets. People rob them, but from police, and say you very careless. Maybe government should do same and rob our homes, shops and offices teach us.

I don't agree.
